About

Welcome to the comprehensive comparison between versions 10.0.48 and 10.0.49. This page highlights the key updates introduced in the new release, providing insights into the changes made to the database schema. You'll find detailed information about newly added tables, fields introduced to existing tables, as well as tables with modified fields or labels. Additionally, we have outlined tables where the row count has been adjusted. Our goal is to make it easy for you to track changes and stay informed about the improvements made in this version update. For more detailed information, please refer to the sidebar where you can explore specific sections.
